Frequently Asked Questions (FAQ)

Q6: What should I do if my Polycom CX400 freezes or crashes?

A1: Firmware updates enhance functionality and address potential bugs. The update process typically involves downloading the latest firmware from Polycom's website and then uploading it to your CX400 via the web interface or using a designated utility. Always consult Polycom's official documentation for specific instructions on updating your firmware, as the process may vary slightly depending on the firmware version.

A4: Screen sharing is typically initiated from the CX400's interface. Look for an option labeled "Share Content," "Present," or a similar term. The exact method may vary depending on your video conferencing platform. Your platform's documentation should provide detailed instructions for screen sharing.

Q1: How do I update the firmware on my Polycom CX400?

A3: Poor audio quality often arises from background noise or microphone issues. Adjust the microphone volume and check for any obstructions near the microphone. Experiment with the audio settings on your CX400 to find the optimal settings for your environment. Consider using a headset for better audio clarity, especially in noisy environments.

Q3: The audio quality on my Polycom CX400 is poor. How can I improve it?
