## Taung Child

*this living group. In 1926, a year after the publication of Dart's article, Aleš Hrdlička reviewed and approved German and Portuguese articles for the American*

The Taung Child (or Taung Baby) is the fossilised skull of a young Australopithecus africanus. It was discovered in 1924 by quarrymen working for the Northern Lime Company in Taung, South Africa. Raymond Dart described it as a new species in the journal Nature in 1925.

Not all infants exposed to alcohol in utero will have detectable...

## Robert Corruccini

*Paleontology from the University of California, Berkeley in 1975. He was named an Aleš Hrdlička Scholar in 1975-1976 by the Smithsonian Institution, later becoming*

Robert Spencer Corruccini (born May 21, 1949) is an American anthropologist, distinguished professor,

Smithsonian Institution Research Fellow, Human Biology Council Fellow (now the Human Biology Association), and the 1994 Outstanding Scholar at Southern Illinois University-Carbondale. As a medical and dental anthropologist, Corruccini is most noted for his work on the theory of malocclusion and his extensive work in a slave cemetery at Newton Plantation in Barbados.

Archives are generally grouped by month of Main Page appearance. (Currently, DYK hooks are archived according to the date and time that they were taken off the Main Page.) To find which archive contains the fact that appeared on Did you know, go to the article's talk page and follow the archive link in the DYK talk page message box or the Article Milestones box.

### Bevacizumab

(5): 1044–52. doi:10.1093/annonc/mdu098.  
PMID 24585722. "Questions and Answers about Avastin" U.S. Food and Drug Administration (FDA). 16 December 2010

Bevacizumab, sold under the brand name Avastin among others, is a monoclonal antibody medication used to treat a number of types of cancers and a specific eye disease. For cancer, it is given by slow injection into a vein (intravenous) and used for colon cancer, lung cancer, ovarian cancer,

glioblastoma, hepatocellular carcinoma, and renal-cell carcinoma. In many of these diseases it is used as a first-line therapy. For age-related macular degeneration it is given by injection into the eye (intravitreal).

Common side effects include sleepiness, rash, and dizziness. Severe side effects include tumor lysis syndrome, blood clots, and peripheral neuropathy. Thalidomide is a known human teratogen and carries an extremely high risk of severe, life-threatening birth defects if administered or taken during pregnancy. It causes skeletal...

Glucose

*humectés d'un peu de petite quantité d'eau, de manière qu'ils mollissent, peuvent alors être pilés, et le suc qu'on en exprime, étant dépuré et épaisse, fournira*

Glucose is a sugar with the molecular formula C<sub>6</sub>H<sub>12</sub>O<sub>6</sub>. It is the most abundant monosaccharide, a subcategory of carbohydrates. It is made from water and carbon dioxide during photosynthesis by plants and most algae. It is used by plants to make cellulose, the most abundant carbohydrate in the world, for use in cell walls, and by all living organisms to make adenosine triphosphate (ATP), which is

used by the cell as energy. Glucose is often abbreviated as Glc.

The several forms of the condition (in order of most severe to least severe) are: fetal alcohol syndrome (FAS), partial fetal alcohol syndrome (pFAS), alcohol-related neurodevelopmental disorder (ARND), and neurobehavioral disorder associated with prenatal alcohol exposure (ND-PAE). Other terms used are fetal alcohol effects (FAE), partial fetal alcohol effects (PFAE), alcohol-related birth defects (ARBD), and static encephalopathy, but these terms have fallen out of favor and are no longer considered part of the spectrum.

### Fetal alcohol spectrum disorder

(PDF), *Canada FASD Research Network "Alcohol and Pregnancy Questions and Answers / FASD / NCBDDD / CDC"*. [www.cdc.gov](http://www.cdc.gov). 4 August 2017. Retrieved 25 September

Fetal alcohol spectrum disorders (FASDs) are a group of conditions that can occur in a person who is exposed to alcohol during gestation. FASD affects 1 in 20 Americans, but is highly misdiagnosed and underdiagnosed.

### Blood alcohol content

*to use the amount of substance, in moles, to quantify the dose. As the molar mass of ethanol is 46.07 g/mol, a BAC of 1 g/L is 21.706 mmol/L (21.706*

Blood alcohol content (BAC), also called blood alcohol concentration or blood alcohol level, is a measurement of alcohol intoxication used for legal or medical purposes.

Common side effects when used for cancer include nose bleeds, headache, high blood pressure, and rash. Other severe side effects include gastrointestinal perforation, bleeding, allergic reactions, blood clots, and an increased risk of infection. When used for eye disease side effects can include...

Jeffrey Dahmer

*Masters 1993, p. 110. Masters 1993, p. 111. Norris 1992, p. 142. Hayden, Aly (November 9, 2017). "Jeffrey Dahmer Crime Scene Photographs". oxygen.com*

Jeffrey Lionel Dahmer (; May 21, 1960 – November 28, 1994), also known as the Milwaukee Cannibal or the Milwaukee Monster, was an American serial killer and sex offender who killed and dismembered seventeen men and boys between 1978 and 1991. Many of his later murders involved necrophilia, cannibalism and the permanent preservation of body parts—typically all or part of the

skeleton.

### Thalidomide

*on – DW – 11/27/2021"; dw.com. Retrieved 11 February 2025. Mathias CB, McAleer JP, Szollosi DE (18 October 2019). Pharmacology of Immunotherapeutic Drugs*

Thalidomide, sold under the brand names Contergan and Thalomid among others, is an oral administered medication used to treat a number of cancers (e.g., multiple myeloma), graft-versus-host disease, and many skin disorders (e.g., complications of leprosy such as skin lesions). Thalidomide has been used to treat conditions associated with HIV: aphthous ulcers, HIV-associated wasting syndrome, diarrhea, and Kaposi's sarcoma, but increases in HIV viral load have been reported.

*another two years to ratifying the peace treaties of Roskilde? ... that Cock ale, described as a "provocative drink"; was popular in 17th- and 18th-century*

This is a record of material that was recently featured on the Main Page as part of Did you know (DYK). Recently created new articles, greatly expanded former stub articles

and recently promoted good articles are eligible; you can submit them for consideration.

Although he was diagnosed with borderline personality disorder, schizotypal personality disorder, and a psychotic disorder, Dahmer was found to be legally sane at his trial. He was convicted of fifteen of the sixteen homicides he had committed in Wisconsin and was sentenced to fifteen terms of life imprisonment on February 17, 1992. Dahmer was later sentenced to a sixteenth term of life imprisonment for an additional...

### Insulin

*Schrier RW (2007). The internal medicine casebook real patients, real answers (3rd ed.). Philadelphia: Lippincott Williams & Wilkins. p. 119. ISBN 978-0-7817-6529-9*

Insulin (, from Latin *insula*, 'island') is a peptide hormone produced by beta cells of the pancreatic islets encoded in humans by the insulin (INS) gene. It is the main anabolic hormone of the body. It regulates the metabolism of carbohydrates, fats, and protein by promoting the absorption of glucose from the blood into cells of the liver, fat, and skeletal muscles. In these tissues the absorbed glucose is converted into either glycogen, via glycogenesis, or fats (triglycerides), via lipogenesis; in the liver, glucose is converted into both. Glucose production and secretion by

the liver are strongly inhibited by high concentrations of insulin in the blood. Circulating insulin also affects the synthesis of proteins in a wide variety of tissues. It is thus an anabolic hormone, promoting the...

The Taung skull is in repository at the University of Witwatersrand. Dean Falk, a specialist in brain evolution, has called it "the most important anthropological fossil of the twentieth century."

BAC is expressed as mass of alcohol per volume of blood. In US and many international publications, BAC levels are written as a percentage such as 0.08%, i.e. there is 0.8 grams of alcohol per liter of blood. In different countries, the maximum permitted BAC when driving ranges from the limit of detection (zero tolerance) to 0.08% (0.8 g/L). BAC levels above 0.40% (4 g/L) can be potentially fatal.

In energy metabolism, glucose is the most important source of energy in all organisms. Glucose for metabolism is stored as a polymer, in plants mainly as amylose and amylopectin, and in animals as glycogen. Glucose circulates in the blood of animals as blood sugar. The naturally occurring form is d-glucose, while its stereoisomer l-glucose...
