The process of day trading can be broken down into 5 steps that will always be the same regardless of the specifics of the trade that is being made. First, you will need to locate an

underlying stock that you are interested in trading based on research done ahead of time. Next, you will need to determine if it aligns with your personalized trading plan. Then, you will take a position based on the current trend of the market before buying or selling once a specific type of movement occurs. Finally, you will repeat this process roughly 100 times a day. There are many traders, especially those who are beginners, who worry about getting started in day trading. They think that this is a dangerous or risky method of trading. But for those who truly know how to read the market, and who are willing to choose the right strategy and stick with it, day trading can be a great way to enter the market with a low budget and make some good profits in the process. Very few careers can offer you the freedom, flexibility, and income that trading does. You can live and work anywhere in the world. You can decide when to work and

when not to work, you do not have a superior that say you continually what to do, you'll have the freedom from all of these things and money not will be anymore a big problem. And now you're one step away from accomplishing this ... Day Trading Starter Quick Guide 2020

Not too long ago, the only people who were actively involved in stock market trading, day trading, and the likes were the major players such as financial agents for big financial houses. The information revolution brought about by the Internet has made stock market trading, day trading, and the likes so easy that you can trade just using a personal computer or even from your mobile phone. Today, you do not need to be a stockbroker or hold a Master's Degree from an Ivy League University to start trading: anyone can do it with the right knowledge and training. Day trading is one of the countless opportunities that the

explosion of the World Wide Web has given us. Day trading is getting increasingly popular among investors these days. This is because day trading is such a lucrative and high-profit kind of trade but all that glitters is not gold! Trading requires stamina but above all it requires preparation. As an amateur, it is easy for you to lose interest in day trading and eventually to find it too demanding and discouraging . No argument here: learning about day trading can be quite hard and tiresome. Almost everyone feels this way at the beginning but hang on and power through because you are not just going to learn a skill, you are going to learn a high-income skill, one that can actually change your life. Trading is not for wannabes without a plan, though. If you aren't motivated to learn, then there is no point going into day trading - unless you enjoy losing money, of course . As a beginner, you do not need to worry about

the process and the steps to follow. This book will help you understanding all that and success is guaranteed. After reading this book, you will know what day trading entails, the skills needed, the mistakes to avoid, what to buy and when to sell with a profit. You will learn the best strategies and approaches to follow to be successful in this trade. The tips and tricks suggested in this book will come in handy and will guarantee that you make the best decisions. The main tools used in day trading are also illustrated: they are invaluable when trading especially when they are coupled with the tips and tricks explained in the book. This book gives a comprehensive guide on the following: - How day trading works - Finding the right stocks to trade - Day trading tools - Opening up a brokerage account - Strategic planning for options trading - Market analysis - Candlestick patterns - Trading cryptocurrencies - Risk and account

management - Beginner's mistakes to avoid... AND MORE!!! Day trading is not for the faint-hearted. It requires stamina, bravery and a deep knowledge of how it works but the rewards can be huge! Day Trading Stocks

Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker

game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk

away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and

throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. In *How to Day Trade for a Living*, I will show you how you too can take control over your life and have success in day trading on the stock market. I love teaching. It's my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to launch yourself into day trading on the stock market. Do you want to learn the best strategies to create a constant stream of income? If yes, then keep reading! When it comes to being a successful trader, there are several skills that one should have. The person should be able to understand deeply the fundamentals of a company, as well as the ability to predict what direction the trend will go to. These technical skills may be impressive, but if the mindset of the trader isn't at top-notch, then there is a big problem. If a trader can't control his emotions or trading psychology, then there is a big issue. Such a person is prone to making decisions based on feelings instead of facts. As a trader, you

are expected to think fast and rationally, moving from one stock to the other quickly. To be able to do this, the trader needs to have some peace of mind, as well as discipline. The trader should be about to stick to his or her trading plans. The thing a lot of traders tend to fear is the thought of their stocks facing doom. It is not wrong to be scared, but you should put a lid on your fears to ensure that you don't overreact to the extent that you liquidate your holdings without looking at the facts. Trading Guide for Beginners

Are you interested in learning day trading strategies? If yes, then this is the right book for you! In day trading, traders keep their titles for one day only. Day trading focuses on buying and selling stock during the same

day; that's why its techniques and tips are different from the other types of trading. A successful day trader is the one who can take advantage of little movements in the prices of stock by playing around them in the right way. This game may appear to be dangerous for the newbie traders who generally don't like to adhere to a well-formulated strategy. However, anyone who wishes to make money with day trading should have a better strategy on how to predict the trend in prices of the stock to maximize profits. When day trading is done right, it allows you to use your time the way you want rather than being chained to a desk all day or any other 9 to 5 job. If you want to travel the world and explore new cultures, then this career should be a serious consideration. If you want the freedom to dictate what you do with your time, then this career should be an option for you. If you want an income that far

surpasses anything you can earn in the regular grind, then this career is for you. You have to make this work for you, and that ability is what separates amateur options day traders and the professionals. Nothing is preventing you from capturing that success for yourself except you. This book covers: Challenges and Rewards Why Do Most Day Traders Lose? The Complete Guide to Day Trading

BLOCKCHAIN Bitcoins as a game changer have virtually set people's imagination into flight. Bitcoins are based on the blockchain technology. Increased exploration of the

further uses of blockchain technologies have showed that there is immense promise in blockchain technologies. No wonder, blockchain contracts are now beginning to be viewed with increased seriousness. Blockchain contracts are contracts which are entered into using the blockchain technology. Unlike the actual world contract, blockchain contracts are different inasmuch as they are executed using the code embedded in the blockchain. As more and more users of blockchain technologies are beginning to emerge, the significance of the blockchain contract is beginning to dawn on the stakeholders. The blockchain contracts bring with them, their own share of legal issues and challenges. World over, cyber legal jurisprudence has not even begun examining the legal nuances concerning the blockchain contract and how Cyberlaw needs to view the blockchain contract. The unique nature of blockchain

contracts and the distinctive role played by technology in enforcing blockchain contracts itself shows that complicated legal and policy issues pertaining to blockchain contracts need to be appropriately addressed as time passes by. This becomes more important, since blockchain technologies hold tremendous promise for the future. This eBook examines the entire concept of blockchain contracts, their specialized features and parameters and connected legalities, more so in comparison with traditional contracts. There are large number of legal, policy and regulatory issues pertaining to blockchain contracts that are beginning to emerge on the horizon. This eBook encapsulates and covers some of the most significant legal and policy issues impacting blockchain contracts. I hope this eBook would set the mind of its readers thinking as to what direction the law needs to take when it

deals with complicated phenomenon like blockchain contracts.

Day Trading For a Living

Are you tired of living paycheck to paycheck? Do you need clear financial information to maximize your investment in trading? If yes, then keep reading... What exactly does a day trader do? Simply stated, a day trader is an individual who enters and exits a position in the markets during the course of the trading day. For the purpose of this book, we will consider a day trade to be a trade that is entered and closed out within the course of the day. It is a simple but clear definition. If, for example,

you decide to keep a trade overnight, then it is really not a day trade and it does not conform to the rules I will present herein. This guide is going to show you everything that makes the markets so amazing. We will show you how to think about the fundamentals of business, how to take that information, use it and create economic forecasts based on it. Originally, the most important U.S. stocks were traded on the New York Stock Exchange. A trader would contact a stockbroker, who would relay the order to a specialist on the floor of the NYSE. Before 1975, brokerage commissions were fixed at 1% of the amount of the trade, i.e. to purchase \$10,000 worth of stock cost the buyer \$100 in commissions and same 1% to sell. Meaning that to profit trades had to make over 2 % to make any real gain. One of the first steps to make day trading of shares potentially profitable was the change in the commission scheme. In

1975, the United States Securities and Exchange Commission (SEC) made fixed commission rates illegal, giving rise to discount brokers offering much reduced commission rates. This book covers the following topics: - What is day trading? - How day trading works? - How to find stocks for trades - Tools and platforms - Money management - Risk management techniques - Trading credit and debit - Average income of a day trader - Starting on your first trade - Day trading glossary ...And much more This book discusses the basics of day trading, the essential information you need as a beginner, the most popular and workable strategies that successful traders have always used, and the daily tips you can leverage for success. It helps you to distinguish between the best platforms and strategies that beginners use from those that suit the veterans. Ready to get started? Click \"Buy Now\"!
