The first-generation Civic was introduced in July 1972 as a two-door fastback sedan, followed by a three-door hatchback that September. With a 1,169 cc transverse engine and front-wheel drive, the car provided good interior space despite its small overall dimensions. Initially gaining a reputation for being fuel-efficient, reliable and environmentally friendly, later iterations have become known for performance and sportiness, especially the Civic Si, SiR...

The Honda N360 is a small front-engine, front-wheel drive, two-door, four-passenger car manufactured and marketed by Honda from March 1967 through 1972 in Japan's highly regulated kei class — as both a two-door sedan and three-door wagon.

### Honda Civic (first generation)

*learned from the Honda 1300. The straight-four engine produced roughly 50 hp (37 kW) and standard features included power front disc brakes, vinyl seating*

The first-generation Honda Civic is an automobile that was produced by Honda in Japan from July 1972 until 1979. It was their first genuine market success, eschewing the air-cooling and expensive engineering solutions of the slow-selling Honda 1300 and being larger than the minuscule N-series. The Civic laid down the direction Honda's automobile design has followed since.

Straight-twin engines are primarily used in motorcycles; other uses include automobiles, marine vessels, snowmobiles, jet skis, all-terrain vehicles, tractors and ultralight aircraft.

After a January 1970 facelift, the N360 became the NIII360 and continued in production until June 1972. A larger-engined variant, the N600, was marketed through 1973. All models used a straight forward two-box design that complied with kei dimensional regulations — though vehicles with the 401 cc and 598 cc engines exceeded the kei engine displacement limits and were largely intended for markets outside Japan.

Honda subsequently marketed a kei-class SUV from 1998 to 2003, bearing no relation to the first 'Z', but bearing the same nameplate.

Dell Latitude is a line of laptop computers manufactured and sold by American company Dell Technologies. It is a business-oriented line, aimed at corporate enterprises, healthcare, government, and education markets; unlike the Inspiron and XPS series, which were aimed at individual customers, and the Vostro series, which was aimed at smaller businesses. The Latitude line directly competes with Acer's Extensa and TravelMate, Asus's ExpertBook, Fujitsu's LifeBook, HP's EliteBook and ProBook, Lenovo's ThinkPad and ThinkBook and Toshiba's Portégé and Tecra. The "Rugged (Extreme)", "XFR" and "ATG" models compete

primarily with Panasonic's Toughbook line of "rugged" laptops.

Front-wheel drive (FWD) is a form of engine and transmission layout used in motor vehicles, in which the engine drives the front wheels only. Most modern front-wheel-drive

vehicles feature a transverse engine, rather than the conventional longitudinal engine arrangement generally found in rear-wheel-drive and four-wheel-drive vehicles.

Suzuki has over 45,000 employees and has 35 production facilities in 23 countries, and 133 distributors in 192 countries. The worldwide sales volume of automobiles is the world's tenth largest, while domestic sales volume is the third largest in the country.
