Many music books are designed to help better understand written music and theory, but "Primacy of the Ear" focuses on the development of the ear. "Primacy" outlines pianist and MacArthur Fellow Ran Blake's approach to growing the ear and explains how musical memory is the key to becoming a more potent musician and shaping a personal musical style. Included are the legendary "ear-robics" exercises, developed by Ran over the course of 30 years as head of the Contemporary Improvisation Department at New England Conservatory of Music. Also covered: The Auteur Theory and how it translates into music making, developing and differentiating between the conscious and subconscious mind, listening and musical memory, how to learn from your musical heroes

without being consumed by them, developing and using repertoire, and how to record your music most effectively. Primacy of the Ear is Ran Blake's genius distilled--his teaching and musical philosophy in one volume. Co-written by Jason Rogers.

California's Sonoma County is known for its wineries and a magnificent natural landscape--a picturesque mix of rugged coastline, steep cliffs, forested hillsides, and verdant agricultural valleys. All hiking levels are included, with a focus on mid-range hikes.

The main focus of this book is on the causation of starvation in general and of famines in particular. The author develops the alternative method of analysis—the 'entitlement approach'—concentrating on ownership and exchange, not on food supply. The book also provides a general analysis of the characterization and measurement of poverty. Various approaches used in economics, sociology, and political theory are critically examined. The predominance of distributional issues, including distribution between different occupation groups, links up the problem of conceptualizing poverty with that of analyzing starvation.

The Financial Crisis Inquiry Report

This national bestseller chronicles one man's 650-mile trek on foot from San Diego to San Francisco—sure to appeal to readers of naturalist works like Edward Abbey's *Desert Solitaire*, Paul Thoreau's *On the Plain of Snakes*, and Mark Kenyon's *That Wild Country*. In 1769, an expedition led by Gaspar de Portola? sketched a route that would become, in part, the famous El Camino Real. It

laid the foundation for the Golden State we know today, a place that remains as mythical and captivating as any in the world. Despite having grown up in California, Nick Neely realized how little he knew about its history. So he set off to learn it bodily, with just a backpack and a tent, trekking through stretches of California both lonely and urban. For twelve weeks, following the journal of expedition missionary Father Juan Crespi?, Neely kept pace with the ghosts of the Portola? expedition—nearly 250 years later. Weaving natural and human history, Alta California relives Neely's adventure, while telling a story of Native cultures and the Spanish missions that soon devastated them, and exploring the evolution of California and its landscape. The result is a collage of historical and contemporary California, of lyricism and pedestrian serendipity, and of the biggest issues facing California today—water, agriculture, oil and gas, immigration, and development—all of it one step at a time. “Rich in little-known history . . . Up the Santa Barbara and San Luis Obispo county coasts, then inland into the Salinas Valley to Monterey Bay. Somewhere along here, the owl moons and woodpeckers do something you might not have thought possible in 2019: they make you fall, or refall, in love with California, ungrudgingly, wildfires and insane housing prices and all . . . What a journey, you think. What a state.” —San Francisco Chronicle

The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to \"examine the causes, domestic and global, of the current financial and economic crisis in the United States.\" It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on \"the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government.\" News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News. His film In Debt We Trust warned of the economic meltdown in 2006. Written with charm and wit, *No Cheating, No Dying* investigates one of the most universal human institutions—marriage. Elizabeth Weil and her husband Dan have two basic ground rules for their marriage: no cheating, no dying. For ten years it's worked fine, but Elizabeth started to wonder if it could be better. Elizabeth Weil believes that you don't get married in a white dress, in front of all your future in-laws and ex-boyfriends but gradually, over time, through all the road rage incidents and pre-colonoscopy enemas, good and bad dinners, and all the small moments you never expected to happen or much less endure. In this book, Weil examines the major universal marriage issues—sex, money, mental health, in-laws, children—through bravely recounting her own hilarious, messy, and sometimes difficult relationship. She seeks out the advice of financial planners, psychoanalysts, therapists, household management consultants, priests, rabbis, and the United States government. Woven into this funny and forthright narrative is Weil's extensive research on marriage and marriage improvement. The result is an illuminating and entertaining read that is a fresh addition to the body of literature about marriage.
